

3.11 – Federal Agency Purchases of Green Power

In March 2004, federal agency purchases of green power reached 527 million kWh, an increase of 70% from July 2003, according to the Federal Energy Management Program (FEMP). Including renewable energy generated from on-site systems, the federal government uses 1,067 million kWh of renewable energy annually, which puts it more than three-quarters of the way toward meeting the 2.5% federal renewable energy usage goal for 2005. The federal goal was established by DOE pursuant to Executive Order 13123, which directed federal agencies to increase their use of renewable energy.
